A unisex cotton t-shirt with a classic style (taped neck and shoulders), made exclusively for VivoSim.

Description
VivoSim T-shirt

A unisex cotton t-shirt with a classic style (taped neck and shoulders), made exclusively for VivoSim.

The prints are ink-based and form part of the garment rather than being printed on top, so the print feels soft and stretches with the shirt. Washed normally the print will last as long as the garment. You can even tumble-dry. All shirts are printed using 100% biodegradable, water-based organic inks meeting the strictest industry standards. The inks are completely vegan-friendly and contain no animal by-products. Our prints are certified safe for children and infants and are 100% toxin-free.

The t-shirts are produced for VivoSim by a carbon-neutral company, that reduces, recycles or reuses all they can, and offset those emissions they can't.

Please note colours and layout shown here are for guidance only and may vary slightly on the actual product.
